

REVIEW OF THE PROJECT ACTIVITY

“Reduction in clinker usage in the production of cement through the increase in the use of additives at Lafarge Malayan Cement Berhad (LMCB)” (1933)

At its forty-sixth meeting the Board could not register the project activity “Reduction in clinker usage in the production of cement through the increase in the use of additives at Lafarge Malayan Cement Berhad (LMCB)” (1933), submitted for registration by the DOE (DNV), because the DOE and project participant failed to substantiate that the presented barriers would prevent an increase in blending rates above the baseline level.
