

**Annex 30****Registration****Scope of the review on****“Guohua Hebei Huanghua 49.5 MW Wind Farm Project (Phase I)” (2125)**

1. The Board agreed to undertake a review of the project activity “Guohua Hebei Huanghua 49.5 MW Wind Farm Project (Phase I)” (2125).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to assess the additionality of the proposed project activity, through an assessment of the investment analysis, in particular:
 - (a) The actual total static investment incurred and the reason for lower annual operating hours in the case of this specific project activity; and
 - (b) The applied tariff, as there are concerns whether the applied tariff can be considered appropriate to assess the additionality of the proposed CDM project activity. Additional information will therefore be sought regarding the tariffs applicable to similar projects, based on available information sources such as national or local guide prices and tariff notifications, and the reasons for the reductions in tariff where reductions have occurred, in particular, whether any reduction reflects a change in the costs of investing in and operating such projects and other changes or whether it impacts the economic viability of such projects.
