

REVIEW OF THE PROJECT ACTIVITY

“Xinjiang Midong Tianshan Cement Co. Ltd’s 1600td Utilization Calcium Carbide for Cement Clinker Project” (3183)

At its fifty-eighth meeting the Board could not register the project activity “Xinjiang Midong Tianshan Cement Co. Ltd’s 1600td Utilization Calcium Carbide for Cement Clinker Project” (3183) as the project participants and the DOE (DNV) have failed to consider the Meth Panel clarification given that it was available prior to the request for registration submission and it clearly states that the methodology is not applicable for the Greenfield projects.
