| <p>As verified by the DOE in page 6 of the Verification Report, “consideration of the project activity efficiency of 33.375% for the emission factor is deemed conservative”. However, 33.00% has been applied in the calculation of emission factor in the spreadsheet and this results in approximately 8,000 more CERs are being claimed for the project activity. Clarification is required on how the DOE has verified that this approach is conservative.</p> | |
