<ol style="list-style-type: none"> 1. The registered PDD stated that "The project generates 4MW of power [equivalent to around 25 million kWh (MkWh)] utilizing the sensible heat from process flue gas of the DRI kiln." However, the monitoring report stated and the verification report confirmed that the capacity of installed generator is 8MW. This is not in accordance with the project activity in the registered PDD. 2. The monitored parameter should be checked with external data such as invoices for exported electricity.
