CDM project activity registration review form (F-CDM-RR) (By submitting this form, a Party involved (through the designated national authority) or an Executive Board member may request that a review is undertaken)	
Designated national authority/Executive Board member submitting this form	
Title of the proposed CDM project activity submitted for registration	Shenzhen Xiaping Landfill Gas Collection and Utilization (0887)
Please indicate, in accordance with paragraphs 37 a validation requirement(s) may require review. A list reasons in support of the request for review, including	·
☐ The following are requirements derived from paragraph 37 of	of the CDM modalities and procedures:
☐ The participation requirements as set out in paragraphs 28 to 30 of the CDM modalities and procedures are satisfied;	
☐ Comments by local stakeholders have been invited, a summary of the comments received has been provided, and a report to the designated operational entity (DOE) on how due account was taken of any comments has been received;	
☐ Project participants have submitted to the DOE documentation on the analysis of the environmental impacts of the project activity, including transboundary impacts and, if those impacts are considered significant by the project participants or the host Party, have undertaken an environmental impact assessment in accordance with procedures as required by the host Party;	
☐The project activity is expected to result in a reduction in anthropogenic emissions by sources of greenhouse gases that are additional to any that would occur in the absence of the proposed project activity, in accordance with paragraphs 43 to 52 of the CDM modalities and procedures;	
The baseline and monitoring methodologies comply with requirements pertaining to methodologies previously approved by the Executive Board;	
☐ Provisions for monitoring, verification and reporting are in accordance with decision 17/CP.7, the CDM modalities and procedures and relevant decisions of the COP/MOP;	
☐ The project activity conforms to all other requirements for CDM project activities in decision 17/CP.7, the CDM modalities and procedures and relevant decisions by the COP/MOP and the Executive Board.	
☐ The following are requirements derived from paragraph 40 of the CDM modalities and procedures:	
☐ The DOE shall, prior to the submission of the validation report to the Executive Board, have received from the project participants written approval of voluntary participation from the designated national authority of each Party involved, including confirmation by the host Party that the project activity assists it in achieving sustainable development;	
☐ In accordance with provisions on confidentiality contain DOE shall make publicly available the project design docu	ined in paragraph 27 (h) of the CDM modalities and procedures, the ument;
The DOE shall receive, within 30 days, comments on the validation requirements from Parties, stakeholders and UNFCCC accredited non-governmental organizations and make them publicly available;	
After the deadline for receipt of comments, the DOE s information provided and taking into account the commen	shall make a determination as to whether, on the basis of the tts received, the project activity should be validated;
☐ The DOE shall inform project participants of its determination on the validation of the project activity. Notification to the project participants will include confirmation of validation and the date of submission of the validation report to the Executive Board;	
☐ The DOE shall submit to the Executive Board, if it determines the proposed project activity to be valid, a request for registration in the form of a validation report including the project design document, the written approval of the host Party and an explanation of how it has taken due account of comments received.	
☐ There are only minor issues which should be addressed by	the DOE / project participants prior to the registration of the project.
Section below to be filled in by UNFCCC secretariat	

Reasons for Request:

Date received at UNFCCC secretariat

1. Comments raised in the stakeholder consultation process were not properly addressed. There was a comment collected in the global stakeholder process (posted on 29th December 2006 by Daniel Rogicki), which clearly states that there is legislation in place in China for LFG collection, while the PDD for this project activity states that there are no regulations in place. If that were the case, the additionality analysis would need to present a stronger case with respect to financial and technological barriers apart from the barriers presented.

20/03/2007

2. Question for clarification.

Project proponents use the Simple OM method to calculate the OM. The methodology states that Simple OM can only be used where low-cost/must run resources constitute less than 50% of total grid generation. Furthermore, it states that if coal is used as must-run, it should also be included in this list, i.e. excluded from the set of plants.

The Project proponents have to clarify if in this region of the P.R. China, low-cost/must-run do no include coal, as might be logical to assume. This situation, if confirmed, will modify the calculation of OM.
