

CDM project activity registration review form (F-CDM-RR) (By submitting this form, a Party involved (through the designated national authority) or an Executive Board member may request that a review is undertaken)

dutifority) of all Excounte Boar	a member may request that a review to anaertakeny	
Designated national authority/Executive Board member submitting this form		
Title of the proposed CDM project activity submitted for registration	1076 SRBSL – Waste Heat Recovery based Captive Power Project	
Please indicate, in accordance with paragraphs 37 and 40 of the CDM modalities and procedures, which validation requirement(s) may require review. A list of requirements is provided below. Please provide reasons in support of the request for review, including any supporting documentation.		
☐ The following are requirements derived from paragraph 37 o	of the CDM modalities and procedures:	
☐ The participation requirements as set out in paragraphs	s 28 to 30 of the CDM modalities and procedures are satisfied;	
☐ Comments by local stakeholders have been invited, a stothe designated operational entity (DOE) on how due accepted.	summary of the comments received has been provided, and a re count was taken of any comments has been received;	
activity, including transboundary impacts and, if those imp	entation on the analysis of the environmental impacts of the projects are considered significant by the project participants or the lent in accordance with procedures as required by the host Party	
	ion in anthropogenic emissions by sources of greenhouse gases of the proposed project activity, in accordance with paragraphs 4	
XX The baseline and monitoring methodologies compl approved by the Executive Board;	y with requirements pertaining to methodologies previously	
☐ Provisions for monitoring, verification and reporting are procedures and relevant decisions of the COP/MOP;	in accordance with decision 17/CP.7, the CDM modalities and	
☐ The project activity conforms to all other requirements and procedures and relevant decisions by the COP/MOP and procedures and relevant decisions by the COP/MOP and procedures are supplied to the conformation of the confor	for CDM project activities in decision 17/CP.7, the CDM modalities and the Executive Board.	
\square The following are requirements derived from paragraph 40 c	of the CDM modalities and procedures:	
	n report to the Executive Board, have received from the project n the designated national authority of each Party involved, includi sts it in achieving sustainable development;	
☐ In accordance with provisions on confidentiality contain DOE shall make publicly available the project design docu	ned in paragraph 27 (h) of the CDM modalities and procedures, tement;	
☐ The DOE shall receive, within 30 days, comments on the accredited non-governmental organizations and make the	ne validation requirements from Parties, stakeholders and UNFC m publicly available;	
☐ After the deadline for receipt of comments, the DOE sh information provided and taking into account the comment	all make a determination as to whether, on the basis of the is received, the project activity should be validated;	
	nation on the validation of the project activity. Notification to the and the date of submission of the validation report to the Executiv	
	rmines the proposed project activity to be valid, a request for project design document, the written approval of the host Party a nts received.	
$\hfill\Box$ There are only minor issues which should be addressed by	the DOE / project participants prior to the registration of the proje	
Section below to be filled in by UNFCCC secretariat		
Date received at UNFCCC secretariat	27/06/2007	

- 1. The PDD refers to the installation of a 50MW captive power plant of which the 9.6MW related to waste heat recovery is the project activity. However the barrier analysis relates to the installation of the captive power plant and not just the project activity. Therefore, the additionality of the project activity requires further substantiation.
- 2. The PDD should clearly and transparently describe the project boundary, which components and fuels

are included in the project activity, and which components and fuels are not included.

UNFCCC/CCNUCC

CDM - Executive Board

Page 2

- 3. It should be clearly justified why the methodology is applicable to the project activity.
- 4. It should be clearly stated whether there are any deviations from the methodology.
- 5. It should be clearly justified that the methodology has been applied correctly. In doing so, why formulae and parameters that are not in the methodology have been used and if any parameters have been calculated when they should be measured.
- 6. The calculation of parameters EGy, EGGEN and EGAUX should be transparently described in the PDD.
