Ref. No. VMPL/DVC/029/05-06

Date : June 05, 2007

The Chief Engineer, (Commercial)

Damodar Valley Corporation

DVC Tower,

V.I.P. Road,

Kolkata - 700 054

Dear Sir,

Sub : Power supply to VMPL Increase in our contract from 11 MVA to 18 MVA

Please refer our earlier letter reference number VMPL/DVC/029/05-06 Dated 19-04-2007 for which we have clearly written that we would like to extend our existing contract from 11 MVA to 15 MVA from 01-07-2007 onwards. We would like to bring to your notice that we are implementing a major expansion like Induction, Concasting, Rolling Mills and Ferro alloys in the same premises which has already communicated in our earlier letter reference number VMPL/DVC/019/05-06 dated 18-07-2006 where we have clearly written that we need 18 MVA Power. As you aware that we have constructed 33 KVA single circuit line from the tapping point at location No. 136 of existing Panchet - DCSL line at our own cost under your supervision. In this connection please note that we have already invested such a huge amount of money so that we can run our plant without any hindrance and uninterrupted at our full capacity, if anyone else is sharing this line with us then we have to shortfall which will result in heavy financial losses to us.

Under this circumstances we would request you to kindly sanction us as per the following schedule from where we need the extra power supply to fulfillment our future requirement to meet our demand for expansion.

- a) Needs increase power from 11 MVA to 15 MVA from 1-08-2007.
- b) Needs balance increase power from 15 MVA to 18 MVA after August, 2007 onwards (Since we are asking you from March, 2004 a copy of that letter also enclosed.)

Keeping this in view our total power requirement will be 18 MVA as per contract will be over after August 2007, therefore we hope you will be kind enough to sanction the same as requested so that we can run our plant at full load capacity. For your ready references, we are enclosing herewith the above related letters for your kind perusal.

Thanking you,

Yours faithfully,

For Vikash Metal & Power Ltd,

Vikash Patel

Director

C.C : The Dy. Chief Engineer, DVC
