Sir,

We are pleased to say that the company has decided to go for a captive power plant of 28 M.W capacity, in phased manner.  
Based on the planned SID capacity, the company has decided to go for 18 M.W power generation capacity on waste heat recovery based boiler using waste gases of SID.

Please explore the most competitive financial arrangements for the same.

Further, the WHRB power plant will be eligible for carbon credit, for which registration with UNFCCC has to be obtained.

So, we request you to please, find out the procedure for getting this registration.

Thanking You.

Yours Faithfully,

For Sree Metaliks Ltd
