MONTALBAN METHANE POWER CORPORATION

5TH Floor, BMMC Building
143 Dela Rosa St. corner Adelantado St.
Legaspi Village, Makati City, Philippines

To: **Mr. Danilo B. Cantiller**
Executive Vice President

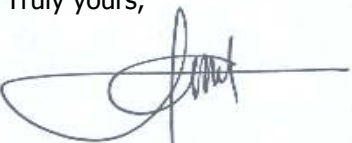

Subject: **Rodriguez Landfill Methane Recovery and Power Generation Project -**
Caterpillar Gas Engine Generator Sets (with Equipment Serial Nos. 4EK05176,
4EK05178, 4EK05179, 4EK05180, 4EK05181, 4EK05182, 4EK05185, 4EK05187 &
4EK05188)

Dear Mr. Cantiller,

With reference to my verbal discussion with Mr. Robert Renfrew, this is to confirm that the Caterpillar Gas Genset Model G3516, specific to the above subject, has a Major Overhaul interval of about 35,000 to 40,000 Service Hours. It is normal that it will take about 2 Major Overhauls before considering the replacement of the equipment, where the actual condition of the equipment will be a major factor to consider. Since the fuel has a corrosive nature (because of impurities) the necessity to replace the equipment might be sooner than later.

For your information and guidance.

Truly yours,

ROMMEL L. DANCEL
