

REVIEW OF THE PROJECT ACTIVITY

“The Rotem Amfert Negev (RAN) Natural Gas Fuel Switch Project” (2042)

At its forty-sixth meeting the Board could not register the project activity “The Rotem Amfert Negev (RAN) Natural Gas Fuel Switch Project” (2042), submitted for registration by the DOE (SGS), because the DOE and project participant failed to demonstrate additionality of the project activity, in particular that the barriers due to uncertainty in fuel supply will prevent the implementation of the project activity or the price differential between the HFO and the NG is not the main driver to implement the project activity.
