

## REVIEW OF THE PROJECT ACTIVITY

### **"Bhushan Power and Steel Limited–Waste Heat Recovery based Captive Power Project" (2519)**

At its fiftieth meeting the Board could not register the project activity "Bhushan Power and Steel Limited–Waste Heat Recovery based Captive Power Project" (2519) submitted for registration by the DOE (SGS) because the DOE and the project participant have failed to substantiate the application and the determination of the baseline scenario as the baseline selected is a new captive coal based power plant whereas the methodology limits the baseline scenario for power generation to be a specific existing power plant or grid import.
