<p>Rice husk consumption is not measured. This parameter should be used for cross checking for steam quantity produced from rice husk. The Monitoring Report p.9 describes the monitoring procedure of biomass consumption as the quantity of biomass used by the project is estimated based on the efficiency of the project. Such monitoring procedure should not be accepted.</p> <p>Calorific value of rice husk, moisture content of rice husk and ash content of rice husk are mentioned in the Monitoring Report p.9 as "monitored on monthly basis", but no results of this "monitoring" are mentioned in the Monitoring Report and no measuring instruments are described.</p>
