<p><b>Reasons for request:</b></p> <p>The validated PDD clearly mentions that only bi-products of the sawmill operations, particularly; wood chips would be used in the project activity.</p> <p>However, the monitoring report shows (Page 13, Monitoring Report) that fresh wood logs supplied by PWA (9,667 metric tons) are also used in the power plant and used to calculate GHG mitigation through methane avoidance.</p> <p>This is clearly out of the scope of this project so that we would not issue the CERs.</p>
