The DOE is requested to clarify how it has verified:

- 1. The daily plant output of HNO3 as required by the methodology since, the monitoring report mentions only the total value in the monitoring period.
- 2. That the actual average daily operating temperature and pressure in ammonia oxidation reactor were within the specified range stated in the PDD, as daily information is not reported in the monitoring report.
- 3. That the actual daily ammonia flow rate in the ammonia oxidation reactor is lower than the maximum historical ammonia input to the reactor.
