## 内蒙古自治区能源工业“十一五”发展规划

- 一、“十五”能源工业发展评价
- ...
- 二、“十一五”期间能源工业面临的发展环境
- ...
- 三、能源市场需求预测
- ...
- 四、“十一五”能源工业发展的指导思想、主要目标及发展重点
- (一) 指导思想
- ...
- (二) 发展目标
- ...

## “Eleventh Five Year Plan” on Energy Industry of Inner Mongolia Autonomous Region

- (1) Assessment on the development of energy industry in the tenth five year period
- ...
- (2) The development environment faced by the energy industry in the eleventh five year period
- ...
- (3) Demand forecast on the energy market
- ...
- (4) The main ideas, targets and focus of the development of energy industry in the eleventh five year period
- 1) Ideas
- ...
- 2) Targets
- ...

### (三) 发展重点

#### 1、煤炭工业

...

#### 2、电力工业

充分利用自治区发展火电的优势，以大型煤田为依托，建设向东北、华北送电的大型坑口、路口火电厂，继续实施西电东送战略，变资源优势为经济优势。加快建设区内用电电源项目，鼓励在大中城市建设热电联产项目，鼓励建设综合利用煤矸石电厂项目。同时加快自治区电网主网架和地区电网的建设，扩大电网的供电范围。

...

#### 3、石油天然气

...

#### 4、可再生能源

### 3) Focus

#### i) Coal industry

...

#### ii) Electric power industry

Make full use of the advantage of our coal fired power plant development to construct large scale power plants by the side of coal mines or roads based on large scale coal mines transmitting electricity to the northeast and north of China, in order to transform the advantage of resource to the advantage of economy via keeping implementing the strategy of transmitting electricity from the West to the East. Fasten power plants construction in our region through stimulating CHP projects in large and middle scale cities and power generation projects integrated use of gangue. Meanwhile, the grid construction should also be accelerated to scale up power supply.

...

#### iii) Oil and natural gas

...

#### iv) Renewable energy

“十一五”期间，自治区将充分发挥风能、太阳能和生物质能等可再生能源资源优势，加快大型并网风电场的建设，做好大型并网太阳能热电项目试点工作，利用风能、太阳能，加快实施新能源通电工程，尽快解决无电地区的用电问题，为全面建设新农村创造条件。

...

#### 五、政策措施

...

The advantage of renewable resources, such as wind, solar and biomass, of our region should be made full use of in the eleventh five year period. The construction of large scale grid connected wind farms should be accelerated and the large scale grid connected solar heat and electricity generation pilot projects should be implemented. The electricity transmission projects whose energy comes from renewable energy like wind or solar should be accelerated to settle the electrification problem in rural areas, which will contribute to the Construction of a New Socialism Rural Area Plan.

...

#### (5) Policies and measures

...
