

关于新疆乌拉泊 30 兆瓦风电项目 融资额外性的确认函

国家开发银行企业局作为新疆乌拉泊风电场 30 兆瓦项目贷款银行的经办机构，在对该项目进行财务评估时，认为风电项目建设成本高，还款压力大。考虑到该项目作为可再生能源利用而带来减排额外收入，将显著改善该项目的收益，增强还贷能力。所以，我局确认 CERs 的收入是保证该项目正常运营和贷款偿还的关键因素。

Confirmation Letter to the Financing Additionality of the Wulabo 30MW Wind Farm Project
in Urumqi

The Enterprise Bureau of the National Development Bank, as a bank organization handling the loan for Wulabo 30MW Wind Power Farm in Urumqi, made the financial evaluation for the project and found that its payback capability of the loan it applied for was under high pressure from high costs of the project construction. On the other hand, however, considering that the project as a renewable energy utilized in a clean development mechanism project could bring about additional revenue from the CO₂ emission reductions, the sales revenue of CERs will improve obviously the financial performance of the project and then its payback capability for the loan, therefore the CDM CERs could be seen as its financial guarantee to the payback of project loan. The Bureau confirmed that the sales revenue of CERs is a key factor to ensure the proper operation of the project and to secure the payback of the loan by the project to the Bank.
