Dear CDM Executive Board Members,

Re: Request for review of the request for issuance for the CDM project activity "MEN-Tangerang 13.6MW Natural Gas Co-generation Project". (Ref. no. 1313)

SGS has been informed that the request for registration for the CDM project activity MEN-Tangerang 13.6MW Natural Gas Co-generation Project." (Ref. no. 1313) is under consideration for review because three requests for review have been received from members of the Board.

The requests for review are based on the same reasons outlined below. SGS would like to provide a response to the issue raised by the request for review:

Request for review issues 1-3, Issue 1:

Further clarification is required on how the DOE verified that the application of net calorific value of natural gas from April 2008 in absence of data in March 2008 is in accordance with the monitoring plan.

SGS' Response to Issue 1:

During the time of Verification the NCV of NG from the supplier was not available as a document. Since the gas was from the same source, as verified from the source and gas bills, the most appropriate trend was applied in the absence of March 2008 data for NCV. The NCV of NG data is obtained on a monthly basis from the gas supplier i.e PGN.

The gas supplier certificate for the gas analysis from PGN for the month of March 2008 (Appendix 1.1) is now available and this has been verified and the revised values have been incorporated in the revised Monitoring report (Appendix 1.2), Revised ER Spreadsheet (Appendix 1.3) and revised verification report (Appendix 1.4).

The inclusion of the actual values has resulted in an increase in ER from 17,041 to 17,154 tCO₂e

We apologize if the initial verification report has been unclear and hope that this letter and the attached information address the concerns of the members of the Board.

Kamesh Iyer (0091 9871794710) will be the contact person for the review process and is available to address questions from the Board during the consideration of the review in case the Executive Board wishes.

Yours sincerely,

Dr. Jochen Gross
