

 <b>CDM project activity registration review form (F-CDM-RR)</b> <i>(By submitting this form, a Party involved (through the designated national authority) or an Executive Board member may request that a review is undertaken)</i>	
<b>Designated national authority/Executive Board member submitting this form</b>	
<b>Title of the proposed CDM project activity submitted for registration</b>	1468 Jilin Liaoyuan Meihe coal mine methane power generation project
<b>Please indicate, in accordance with paragraphs 37 and 40 of the CDM modalities and procedures, which validation requirement(s) may require review. A list of requirements is provided below. Please provide reasons in support of the request for review, including any supporting documentation.</b>	
<input type="checkbox"/> <i>The following are requirements derived from paragraph 37 of the CDM modalities and procedures:</i> <ul style="list-style-type: none"> <li><input type="checkbox"/> The participation requirements as set out in paragraphs 28 to 30 of the CDM modalities and procedures are satisfied;</li> <li><input type="checkbox"/> Comments by local stakeholders have been invited, a summary of the comments received has been provided, and a report to the designated operational entity (DOE) on how due account was taken of any comments has been received;</li> <li><input type="checkbox"/> Project participants have submitted to the DOE documentation on the analysis of the environmental impacts of the project activity, including transboundary impacts and, if those impacts are considered significant by the project participants or the host Party, have undertaken an environmental impact assessment in accordance with procedures as required by the host Party;</li> <li><input checked="" type="checkbox"/> The project activity is expected to result in a reduction in anthropogenic emissions by sources of greenhouse gases that are additional to any that would occur in the absence of the proposed project activity, in accordance with paragraphs 43 to 52 of the CDM modalities and procedures;</li> <li><input checked="" type="checkbox"/> The baseline and monitoring methodologies comply with requirements pertaining to methodologies previously approved by the Executive Board;</li> <li><input checked="" type="checkbox"/> Provisions for monitoring, verification and reporting are in accordance with decision 17/CP.7, the CDM modalities and procedures and relevant decisions of the COP/MOP;</li> <li><input type="checkbox"/> The project activity conforms to all other requirements for CDM project activities in decision 17/CP.7, the CDM modalities and procedures and relevant decisions by the COP/MOP and the Executive Board.</li> </ul>	
<input type="checkbox"/> <i>The following are requirements derived from paragraph 40 of the CDM modalities and procedures:</i> <ul style="list-style-type: none"> <li><input type="checkbox"/> The DOE shall, prior to the submission of the validation report to the Executive Board, have received from the project participants written approval of voluntary participation from the designated national authority of each Party involved, including confirmation by the host Party that the project activity assists it in achieving sustainable development;</li> <li><input type="checkbox"/> In accordance with provisions on confidentiality contained in paragraph 27 (h) of the CDM modalities and procedures, the DOE shall make publicly available the project design document;</li> <li><input type="checkbox"/> The DOE shall receive, within 30 days, comments on the validation requirements from Parties, stakeholders and UNFCCC accredited non-governmental organizations and make them publicly available;</li> <li><input type="checkbox"/> After the deadline for receipt of comments, the DOE shall make a determination as to whether, on the basis of the information provided and taking into account the comments received, the project activity should be validated;</li> <li><input type="checkbox"/> The DOE shall inform project participants of its determination on the validation of the project activity. Notification to the project participants will include confirmation of validation and the date of submission of the validation report to the Executive Board;</li> <li><input type="checkbox"/> The DOE shall submit to the Executive Board, if it determines the proposed project activity to be valid, a request for registration in the form of a validation report including the project design document, the written approval of the host Party and an explanation of how it has taken due account of comments received.</li> </ul>	
<input type="checkbox"/> There are only minor issues which should be addressed by the DOE / project participants prior to the registration of the project.	
<b>Section below to be filled in by UNFCCC secretariat</b>	
Date received at UNFCCC secretariat	04.04.2008

1. The DOE is requested to confirm how it has assessed the suitability of the benchmark, and to confirm with what level of assurance it can state that an IRR of 12.14% is an insufficient return for this project to proceed without the incentive of the CDM.
2. The DOE shall confirm the suitability of the input values used in the investment analysis.
3. The project activity start date in the PDD is prior to the date of validation. Therefore the DOE is requested to explain why it has not raised a corrective action request regarding the inclusion of evidence of the prior consideration of the CDM in section B.5 of the PDD. The DOE should further describe how the start date of the project activity has been validated.

4. Further evidence is required to support the exclusion of option 5 (captive power generation) as it is not clear why importation of electricity from the grid cannot be used as a back-up to the captive generation.
5. Further evidence is required to support the suitability of the 13% discount rate applied in the levelised cost of electricity calculation as this value differs from the benchmark used in the additionality assessment and differs from common benchmarks used in China for power generation.
6. The monitoring plan should contain separate entries to ensure that the parameters related to the two wells are reported separately.
