

**REVIEW OF THE PROJECT ACTIVITY****“Yixing Shuanglong Cement Plant's Low Temperature Waste Heat Power Generation”
(1914)**

At its forty-ninth meeting the Board could not register the project activity “Yixing Shuanglong Cement Plant's Low Temperature Waste Heat Power Generation” (1914) submitted for registration by the DOE (TÜV-SÜD) as the DOE has failed to provide the further validation, requested by the Board at its forty-sixth meeting, to confirm that the electricity tariff used in the PDD is appropriate to account for the savings from avoided purchases of electricity from the grid, and therefore the additionality of the project activity has not been established.
