

CDM-EB70-A24-CLAR

Clarification

ACM0012: Consolidated baseline methodology for GHG emission reductions from waste energy recovery projects (version 04.0.0)

Version 01.0

United Nations
Framework Convention on
Climate Change

1. Introduction

1. The following clarification on the application of annex 2 of the methodology ACM0012 "Consolidated baseline methodology for GHG emission reduction from waste energy recovery projects" (version 04.0.0) is provided to address and rectify an anomaly.

2. Clarification

2. The Executive Board of the clean development mechanism agreed to issue the clarification that the condition mentioned in the chapeau of annex 2 as below:

"The DOE should supplement the analysis prescribed by following methods through the on-site checks prior to project implementation to confirm that no equipment for waste energy recovery and utilisation had been installed on the specific WECM stream (that is recovered under the project activity) prior to the implementation of the CDM project activity. In case the project activities improve the energy recovery from the already existing WECM stream(s), the DOE will make the on-site checks to confirm the above with respect to unrecovered stream or energy",

should be read as one of the methods, and not as supplementary analysis to the methods provided, to demonstrate that the waste energy utilized in the project activity was flared or released into the atmosphere or remained unutilised in the absence of the project activity.
