

Final Ruling Regarding the Request for Registration of

“Carroll’s Foods do Brasil & LOGICarbon – GHG Emission Reductions from Swine Manure Management System, Diamantino, MT, Brazil” (4293)

The CDM-Executive Board decided to reject the above proposed project activity on 29 September 2011, during its 63rd meeting, in accordance with the “*Procedures for review of requests for registration*”, version 1.2, EB 55, Annex 40, paragraphs 23, 24 and 28 (the procedures). In accordance with paragraph 27 of the procedures, the ruling shall contain an explanation of the reasons and rationale for the final decision which are as follows:

- The DOE (BVC) failed to substantiate the additionality of the proposed project activity and meet the validation requirements for key input values to the investment analysis; in particular the installation cost for the digesters, the installation cost for monitoring system, the generator and equipment costs, generator group cost, and other equipment and installation costs; in accordance with version 1.2 of the Validation and Verification Manual (VVM) paragraph 111(b).
- The VVM, paragraph 111 states that “*To verify the accuracy of financial calculations carried out for any investment analysis, the DOE shall: ... (b) Cross-check the parameters against third-party or publicly available sources, such as invoices or price indices*”.
- The DOE has failed to substantiate the suitability of the key input values to the investment analysis in accordance with paragraph 111(b) of the VVM as the reported cross-checking by the DOE against the invoices from several suppliers was carried out through checking the same source documents that were already used as sources for the input values i.e invoices from several suppliers.

Please note, however, that, with appropriate revisions, this project activity may be resubmitted for validation and registration provided it meets the requirements for validation and registration, in accordance with paragraph 42 of the CDM Modalities and Procedures (Decision 3/CMP.1).
