

## Expert assessment form for proposed new methodology for CCS CDM project activities - second review (CDM expert) (Version 01.0)

(To be used by methodology second experts providing	desk review for a proposed new methodology).	
Name of expert responsible for completing and submitting this form:		
Related F-CDM-CCS-NM document ID number:		
Note to reviewers: Please provide recommendation methodologies based on an assessment of CDM-N draft CDM-CCS-PDD, desk reviews and public input that arguments and expert judgements are substated	IM and of its application in sections A to C of the it. Please ensure that the form is completed and	
History of submission: (to be communicated to review	wers by UNFCCC Secretariat)	
Note to reviewers: If the methodology is a resubmission, please read the previous version and associated CCS Working Group recommendations.		
>>		
Title of the proposed new baseline and monitoring	methodology:	
EVALUATION OF THE PROPOSED NEW IN	IETHODOLOGY BY THE DESK REVIEWER	
A. Changes needed to improve the methodology		
A. Changes needed to improve the methodology  (1) Outline any changes needed to improve the me	thodology:	
	thodology:	
(1) Outline any changes needed to improve the me	thodology:	
(1) Outline any changes needed to improve the me  (a) Major changes:	thodology:

(1) Outline any changes needed to improve the me  (a) Major changes:  >>  (b) Minor changes:  >>  B. Details of the evaluation of the proposed new re  Evaluate each section of CDM-CCS-NM. Please pro  (1) Applicability conditions:	nethodology	
(1) Outline any changes needed to improve the me  (a) Major changes:  >>  (b) Minor changes:  >>  B. Details of the evaluation of the proposed new resultance each section of CDM-CCS-NM. Please pro  (1) Applicability conditions:  (a) State the applicability conditions as provided in	nethodology ovide your comments section by section:	

Version 01.0 Page 1 of 6

(c)	Explain whether the guidance is provided to check whether the project activity applicable under the methodology comply with the key applicability conditions of methodology. Whether such provision of guidance is needed for some of the conditions? If yes, what are the possible means to demonstrate compliance?
>>	
(2) De	finition of the project boundary:
(a)	State how the project boundary is defined in terms of:
	(i) Gases and sources
	>>
	(ii) Physical delineation
	>>
(b)	Indicate whether the project boundary adequately covers all the key components/ emissions of project activity and baseline situation. If not, which further components/ emission could be included?
>>	
(3) Ide	entification and characterization of the geological storage site (GGS):
(a)	State how the GSS is identified and characterized.
(b)	Indicate whether this procedure is appropriate. If not, outline required changes.
(4) De	termining the baseline scenario and demonstrating additionality:
(a)	Explain the methodological basis for determining the baseline scenario, and whether this basis is appropriate and adequate. If not, outline required changes.
>>	
(b)	Explain whether the application of the methodology could result in a baseline scenario that reasonably represents the anthropogenic emissions by sources of greenhouse gases that would occur in the absence of the proposed project activity.
>>	
(c)	State whether the documentation explains how, through the use of the methodology, it can be demonstrated that a project activity is additional and therefore not the baseline scenario. If so, what
>>	are the tools provided by the project participants?
(d)	Explain whether the basis for assessing additionality is appropriate and adequate. If not, outline required changes.
>>	

Version 01.0 Page 2 of 6

## (5) Methodological basis for calculating baseline emissions and emission reductions: Baseline emissions: (a) Is the baseline situation of methodology well described? >> (b) Are all the necessary components of baseline scenario described under the methodology and well covered under baseline emissions? >> (c) Are the baseline emission equations correct and consistent? >> (d) Offer comments on the conservativeness of baseline emissions. >> (e) Offer comments on the practical aspects of estimation of baseline emissions. (f) Are the baseline emissions under the CDM-CCS-PDD consistent with the methodology? (g) Any other comments on baseline emissions. >> Project emissions: (a) Is the project situation of the methodology well described? >> (b) Are all necessary components of the project technology described under the methodology and well covered under project emissions? >> (c) Are the project emission equations technically correct and consistent? (d) Offer your comments on the conservativeness of project emissions. (e) Offer comments on the practical aspects of estimation of project emissions. >> (f) Are the project emissions under the CDM-CCS-PDD consistent with the methodology? >>

Version 01.0 Page 3 of 6

F-CDM-CCS-NM	SE
(g) Any other comments on project emissions.	
>>	
Emission reductions:	
Offer your comments, whether the technology referred to in the methodology can lead to emission reductions as stated in the PDD? What are the short-term or long-term risks and uncertainties associated	ქ?
>>	
(6) Leakage:	
(a) Are the leakage emissions in the methodology adequate and are they conservatively calculated?	
>>	
(b) Are the leakage emissions under the CDM-CCS-PDD consistent with the methodology?	
>>	
(c) Any other comments on leakage emissions.	
>>	
(7) Data and parameters NOT monitored (i.e. data that is determined only once and remains fixed throughout the crediting period):	
(a) Explain whether the vintage (in relation to the duration of the project crediting period) of data is appropriate, indicating the period covered by the data. If not, outline required changes.	
>>	
(b) Describe the numerical modelling requirements for characterizing the GSS.	
>>	
(c) Give your expert judgement on whether the data and the measurement procedures (including numerical modelling) used are adequate, consistent, accurate, reliable, and cost effective. Identify those, if any, which are problematic and outline required changes.	,
>>	
(d) Are the parameters described in the monitoring methodology consistent with the baseline emissio sections? If not, state possible data gaps.	n
>>	
(8) Key data and parameters monitored (i.e. data that is determined throughout the crediting perio	d):
(a) Give your expert judgement on whether the data sources and measurement procedures (if any) us are adequate, consistent, accurate, reliable and cost effective. If not, outline required changes.	sed
>>	

Page 4 of 6 Version 01.0

(b) Give your expert judgement on whether the monitoring frequency for the data and parameters is appropriate. If not, outline required changes.

>>	
<ul><li>(c) Give your expert judgement on whether the QA required changes.</li></ul>	VQC procedures are appropriate. If not, outline
>>	
(d) Are the parameters described in the monitoring emission sections? If not, state possible data g	methodology consistent with the project and leakage aps.
>>	
(9) If relevant, state whether the proposed changes 2nd and 3rd crediting periods are consistent with a original/current baseline and to update the baseline annex to the "Procedures for renewal of the credit available at the following website: <a href="https://cdm.unfccc.int/Reference/Procedures/reg">https://cdm.unfccc.int/Reference/Procedures/reg</a> >>	the "Tool to assess the validity of the le at the renewal of a crediting period" which is an ing period of a registered CDM project activity",
(10) Any other comments:  (a) State which other source(s) of information (i.e. methodology available on the UNFCCC CDM v	other than documentation on this proposed veb site) have been used by you in evaluating this
methodology. Please provide specific reference	
>>	
(b) Indicate any further comments.
