INFORMATION FOR COMPLETING THE FORM	
A. Briefly describe the summary of the proposed submission indicating the specific renewable energy technologies being recommended	
B. The following requirements shall be taken into account	
<input type="checkbox"/> Refer to the most recent versions of “Guidelines for demonstrating additionality of microscale project activities” ¹ and “Procedure for submission and consideration of microscale renewable energy technologies for automatic additionality” ² and “Guidelines on the demonstration of additionality of small-scale project activities” ³ .	
<input type="checkbox"/> Most recent available, but not older than three years from the date of submission, data on the percentage of contributions of specific renewable energy technologies in the total installed grid connected power generation capacity in the country shall be used for calculations. Example templates are annexed to this form as table 1 and table 2;	
<input type="checkbox"/> Include any additional documentation supporting the submission where applicable (e.g. relevant data, documentation, statistics, studies).	
<input type="checkbox"/> Upload the above documentation to the UNFCCC CDM website, submissions may be sent to email account < secretariat@unfccc.int > until the submission interface on the UNFCCC CDM website becomes operational.

capacity up to 15 MW are already included in a positive list of technologies that are automatically defined as additional and therefore these technologies need not be recommended under the scope of this submission.

Annex

Table 1: Contributions of specific renewable energy technologies (RET) in the total installed grid connected power generation capacity in the country

	Grid connected electricity generation technology	Total installed capacity of RET <= 5MW in year y (MW) (A)	Total Installed capacity of technology in year y (MW)⁴ (B)	(C) = (A) / $\sum(B)$ in year y (%)⁵	Data sources/references
