SECTION 3: YOUR COMMUNICATION

Title/Subject Maximum 250 characters

As using the methodological tool "Demonstration of additionality of microscale project activities" (hereinafter referred as "the Tool"), there is a trouble of determining whether the project activities are not eligible by the paragraph 13 (a) "Project activities remain under the thresholds defined above during each year of the crediting period and in cases where ex ante projected emissions reductions show an increase during the crediting period; project activities that go beyond the microscale limits in any year of the crediting period are not eligible ".

Here are 2 scenarios for type III CDM project with 7-year crediting period to address the trouble we met:

---

\(^1\) In accordance with the "Procedure: Direct communication with stakeholders" (version 02.0), stakeholders may address communications either (a) to the secretariat, in order to seek a fast-track technical or operational explanation regarding the implementation of existing CDM rules, or (b) to the CDM Executive Board, in order to communicate to the Board their views on CDM rules and their implementation, or to seek official clarifications of CDM rules.
Scenario 1: the Project 1’s ex ante emissions reduction as below are less than 20 kt CO2e per year during each year of the crediting period and shows a gradually increasing reduction during the crediting period, from 2 to 14 kt CO2e per year.

Crediting period year
1 2 3 4 5 6 7
Projected emission reduction
(ktCO2e) 2 4 6 8 10 12 14

The question is that the Project 1 meets the criteria in paragraph 2(a) of the Tool "aim to achieve GHG emissions reductions at a scale of no more than 20 kt CO2e per year" so that the Tool is applicable. However, based on paragraph 13 (a) of the Tool, is the Project 1 recognized as the case of "in cases where ex ante projected emissions reductions show an increase during the crediting period" so as to not be eligible as a microscale project?

Scenario 2: the Project 2’s ex ante emissions reduction as below are less than 20 ktCO2e per year during each year of the crediting period, except that the 5th year’s emissions go beyond the microscale limits of 20kt CO2e per year.

Crediting period Year
1 2 3 4 5 6 7
Projected emission Reduction
(ktCO2e) 2 4 6 8 21 19 18

The question is that since only the 5th year of the Project does not meet the eligibility of paragraph 13(a), is only the 5th year of the Project 2 not be eligible as a microscale project activities?
