To
The Executive Board,
UNFCCC.

Ref: Annex 46 of EB 41 Report.

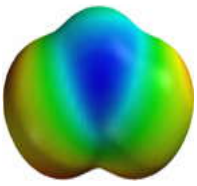

Sir / Madam,
Sub: Prior Consideration of CDM.

With reference to above subject, We kindly request you to clarify and justify our following comments and try to accept our suggestion for the welfare of our Globe.

For the Existing Project Activities, Proposed Project Activity with a start date before 2 August 2008, for which the start date is prior to the date of publication of PDD for Global stakeholder consultation, are required to demonstrate that the CDM was seriously considered in the decision to implement the Project Activity. Such demonstration requires the following element to be satisfied:

- (a) The Project Participant must indicate awareness of the CDM prior to the Project Activity Start Date, and that the benefits of the CDM were a decisive factor in the decision to proceed with the project. Evidence to support this would include, inter alia, minutes and/or notes related to the consideration of the decision by the Board Directors, or equivalent, of the Project Participant, to undertake the project as a CDM project activity.
- (b) The Project Participant must indicate, by means of reliable evidence, that continuing and real actions were taken to secure CDM status for the project in parallel with its implementation. Evidence to support this should include, inter alia, contracts with consultants for CDM/PDD/methodology services, Emission Reduction Purchase Agreements or other documentation related to the sale of the potential CERs (including correspondence with multilateral financial institutions or carbon funds), evidence of agreements or negotiations with a DOE for validation services, submission of a new methodology of the CDM Executive Board, publication in newspaper, interviews with DNA, earlier correspondence on the project with the DNA or the UNFCCC secretariat;

If evidence to support the serious Prior consideration of the CDM as indicated above is not available the DOE shall determine that the CDM was not considered in the decision to implement the project activity.

Our Comments:

Let our Comments be specifically for the Wind Mill Projects of India.

Generally, Wind Farm Manufacturers are marketing to invite the Investors to invest in the Wind Farm Projects as Project Participant. During the stage of marketing, they are introducing the CDM benefits of the project to attract the investors to invest in the Wind Farm Projects to save our Globe from the Global Warming along with the financial feasibility of the project.

So, by prior considering the CDM benefits for the financial feasibility of the Wind Farm Projects, Investors are interested to invest in the Wind Farm Projects to save our Globe from the Global Warming.

But, most of the Wind Mill Manufacturers and Marketers had not guided the Wind Mill Project Proponents, for the right procedures to adopt to avail the CDM benefits.

Of course, Most of the Wind Mill Project Proponents are still not aware of the procedures to adopt to avail the CDM benefits, **but each and every Indian Wind Mill Project Proponents are very much aware of the CDM benefits for the Wind Mill Project**, due to which, they had invested on those projects to save our Globe from the Global Warming.

Hence, after the investment and contribution made by the Wind Mill Project Proponents to save our Globe from the Global Warming, the barriers of Un Awareness and Non Guidance for the procedures to adopt to avail the CDM benefits at right time are screwing the project proponents from the Financial Crisis due to non feasibility of the project.

Due to which, the most of the Existing Wind Mill Project Proponents are in lack of financial eligibility to invest further in the same Wind Mill Projects, though they are interested, as each and every Human Being of our Globe are individually responsible to save our Globe from the Global Warming .

Our Suggestion:

- Rejection of CDM Projects due to lack of proof to demonstrate the prior consideration of CDM can be avoided for the both Existing and New Project Activities.
 - (a) This decision will definitely motivate the Existing Wind Mill Project Proponents to invest further in the New Wind Mill Projects, which simultaneously save our Globe from the Global Warming.
- Kindly treat our above comments and suggestions not only for the Indian Wind Mill Projects, but for all CDM Projects if possible.

We, on behalf of each Human Being of our Globe will be very much Thankful to the Executive Board of UNFCCC, if our above comments and suggestions are considered and even if not so.

Thanking you,

Yours truly,

For **R.S.J.Ozone Private Limited**

(S.Babu)

Director
