**Public Call for Inputs on “Efficiency in the operation of the CDM and opportunities of improvement”**

**Area 1:**

***Recognition of CDM advisors by EB***

There are many CDM advisors which have played important role in making the entire CDM process work and evolve over the past few years. These CDM advisors are known in the market and have a proven track record.

EB should “Recognize” these CDM advisors. ‘Recognized’ CDM Advisors shall be allowed to carry out following task –

1. Seeking clarifications/ deviation/ revision on behalf of PP or independently on small or large scale methodologies
2. Proposing new methodologies in both small scale and large scale areas

It will have following impact on the process –

1. DOEs will save time and resources for carrying out validation and verification of CDM projects.
2. CDM advisors would be an extended resource pool for EB.

Following would be the criteria of ‘Recognizing’ CDM advisors –

1. Advisors with a proven track record with 20+ registered CDM projects.
2. Advisors with a Team of minimum 5 people with qualification and experience in the relevant areas

**Area 2:**

***Proposing clarification on large scale methodology/ new methodologies:***

For small scale methodologies, Project Proponents can seek clarification from the Working Group without involving DOEs. Due to this, a large number of clarifications have been sought for small scale methodologies, which has helped in correcting/ modifying many methodologies.

**Sustainable Solutions for the Environment**

Similar provision should be made for large scale methodologies and projects based on large scale methodologies. 'Recognized' CDM advisors shall carry out the task on behalf of PP and/ or independently.
