**Re: Call for inputs on *simplified modalities for demonstrating additionality of small scale renewable energy and energy efficiency project activities***

Dear Sir/Madam,

The Board, at its fifty-third meeting, agreed to open a call for public inputs inviting suggestions for “*Simplified modalities for demonstrating additionality of small scale renewable energy and energy efficiency project activities*” from 26 March 2010 to 12 April 2010.

In order to comply with the threshold of SSC projects, CEC suggests that: the limited capacity of the renewable energy projects could be up to 15MW.

CEC would like to commend the EB for its hard work and efforts to increase the utility of the document.

Yours Sincerely,

Climate Change Programme
