

Focus areas for future practitioner workshops for CDM Stakeholders identified by KH Sharma

1. Monitoring top management commitment of DOE by identifying specific parameters and criteria such as building and maintaining competent validation/verification team in order to ensure quality and timely validation.
2. Improving CDM performance in LDC and African countries by helping them in identification of the potential CDM sectors and projects. The CDM performance can be improved by facilitating support in relevant areas such as technology transfer, financial assistance & building local CDM consultancy resource.

I wish to get involved in following groups / panels:

1. Accreditation Panel or Assessment team
2. Registration & Issuance Team
3. Ad-hoc CDM group

Warm regards,

KH Sharma
