

Washington DC, August 25, 2010

Dear Members of the CDM Executive Board,

In response to the open call for public inputs on focus areas for future practitioner workshops for CDM stakeholders, please consider the below suggestion for focus area:

- Develop a series of regional workshops for project developers on designing and implementing A/R CDM projects, specifically on important initial considerations for design, applying A/R CDM methodologies, aspects of monitoring (designing a monitoring plan, in paper and in practice), financial aspects of A/R CDM projects, developing PDD, important EB decisions, etc.

Thank you in advance for your attention.
