Dt. 06.12.2010

CDM Executive Board
UNFCCC Secretariat
Germany

Dear **Mr. Mahlung**,

This is in reference to the call for public inputs from 1 December 2010 to 12 January 2011 on the draft revised "Guidelines on the assessment of investment analysis".

The amendment which meth panel has suggested to the tool is not practical, as its not country economy specific or country investment time specific & we are not in the opinion to adopt the same. Many inputs had been given over the WACC tool at https://cdm.unfccc.int/public_inputs/2010/wacc_tool/index.html which covers all our comments, as suggested by the eminent authorities across the World.

Thus suggested to go though all the comments once again.

Regards,

Manish Dabkara
