

**Call for public input on "Issues included in the annotated agenda of the sixty-third meeting of the CDM Executive Board and its annexes"**

1. While going through the Annex 15 of EB 63 Proposed agenda – Annotations, it is observed that the Attachment A to Appendix B which is used for the demonstration of additionality for the small scale projects has not been covered under it. I think that the Attachment A to Appendix B should also be revised similar to 'Tool revision of the 'Tool for the demonstration and assessment of additionality' and 'Combined tool to identify the baseline scenario and demonstrate additionality' in order to remove reference to barriers due to prevailing practice, *inter alia*: the project activity is the .first of its kind.
