

This is in reference to the UNFCCC call for public inputs on PoA, where the Board specially seeks for inputs, in the above context, on the following:

- (a) What are the possible alternative concepts for a PoA?
 - (i) If the PoA is a small scale activity and penetration of relevant activities without the CDM assistance is not significant when the PoA establishes the baseline and Additionality, CPAs should be able to be added to the PoA with minimal rules regarding Additionality
- (b) What are the barriers in the current rules?
 - (i) Not clear how additionality is established for CPAs when the Additionality is dealt with at the PoA level
- (c) What are the rules that are not existing or are missing and should be there?
 - (i) To state on when validation process for PoA, that the subsequent CPA can initiate/ start to be validated
