

Executive Board, at its fifty-ninth meeting - Public inputs on programme of activities (PoA)

- 1) Inter-usability of default values in various methodologies for similar sectors.

Description: One of ongoing CDM project involves distribution of energy efficient CFLs in India. As a part of process, Project proponent is expected to provide average operating hours of lighting under section E.7.1 of PoA-DD. As the AMS-II.J provides default value of 3.5 hours, the acceptance of the same in the AMS-II.C would help in simplifying the registration process of CDM-PoA process for projects which involve replacement of incandescent lamps with energy efficient lighting in non-residential sectors.

Kindly accept the same and update the guidelines
