

In my opinion, the proposed Very Small Scale project activity should also satisfy the debundling norms according to paragraph 2 of Appendix C of the Simplified Modalities and Procedures for Small-Scale CDM project activities as under:

A very small-scale project activity shall be deemed to be a debundled component of a large project activity if there is a registered small-scale CDM project activity or an application to register another Very small-scale CDM project activity:

- With the same project participants;
- In the same project category and technology/measure; and
- Registered within the previous 2 years; and
- Whose project boundary is within 1 km of the project boundary of the proposed small-scale activity at the closest point.
