Issue No.	Issue to be addressed (including need for change)	Proposed change (including proposed text, if applicable)
1	It has been proposed: "In the case of afforestation or reforestation project activities for which tCERs are issued, subsequent verification and certification can be carried out only once in each subsequent commitment period"	In the case of projects for which tCERs are issued, it should be allowed to carry out additional verifications and certifications within the same commitment period provided that in each verification only the increment since the previous verification and certification in the same commitment period is accounted for. This would ensure that no double issuance of tCERs in a commitment period occurs, and also it would give flexibility to project participants to carry out verifications and certifications more frequently.
