Subject Clarification on PoA CDM projects submission deadline

Honorable Members of the CDM Executive Board,

Dear Sir,

We would like to have clarification on the timeline of the submission of PoA CDM Projects for request for registration. Due to the tight schedule to register the projects by end of this year to ensure the eligibility of credits into the EU ETS and also due to the overload of the projects upon DOEs, we are facing problems where DOEs have stopped taking up new projects for validation.

However, if the Project Participant starts the validation of the PoA Project now, is there any deadline for submitting the project for “request for registration”? The minimum duration of the validation and request for registration procedure is 6-8 months for the CDM Project. So, if the project is submitted for “request for registration” before the end of this year, but it does not get registered due to the questions raised in the completeness check or information and reporting check or if a review is requested, then the project has to be resubmitted for request for registration after 2012?

It would be of great help to us if you could provide us clarity on the effect of late submission of the PoA project to UNFCCC and validity of the submission of the request for registration after September 2012.

With Best Regards,

Vivek Amin

Head – CDM
Abellon CleanEnergy Limited

Please provide any specific suggestions or further information which would address the issue raised in the previous section, including the exact reference source and version (if applicable).
