Re.: Clarification for method to assigning default value efficiency of a flare unit

Dear Ms. Hendrayani,

Thank you for your letter received on 21 June 2012, which has been made available to the Chair of the Board.

On behalf of the Chair of the Board, I would like to inform you that a revision of the “Tool to determine project emissions from flaring gases containing methane” was approved at the sixty-eighth meeting of the Executive Board and more options are now available for the project participants to monitor the flare efficiency on a minute basis. The tool was renamed “Project emissions from Flaring” and can be found in the Annex 15 of the report of the sixty-eighth meeting of the CDM Executive Board.

I hope this letter suitably addresses all your concerns.

Yours sincerely,

Andrew Howard
Secretary to the CDM Executive Board
