Dear All,

I am the director at Eenergy Brasil Ltda which belongs to GDF-Suez Group. We are CDM consultancy with a huge experience in CDM Market since 2005. In our portfolio has around 50 registered CDM project with more than 7 million of issued CERs.

We face some difficulties to understand clearly which is the deadline to register projects under CDM Kyoto Protocol.

In our concern there are 5 milestones in the registering process which are:

- Submission to registration;
- Payment of registration fee;
- Conclusion of completeness check
- Requesting registration
- Effective registration of the project

Questions:

1. Which of the milestone above is the limit to Union European Community purchase the CERs from CDM projects?
2. In case where the project receives an incomplete check, which event (milestone, PP response, UNFCCC feedback) will be considered for the registration of the project considering that after this incomplete check, the PP would respond the opened issue and would conclude the registration process without further problems.
3. In case where the project receives an incomplete check, which event (milestone, PP response, UNFCCC feedback) will be considered for the registration of the project considering that after this incomplete check, the PP would respond the opened issue. However, in case when during the request for registration the project receives a request for correction (correction requested) or review (review requested), which would be the event considered as the registration date (PP response, UNFCCC feedback)?

Yours faithfully,

Please provide any specific suggestions or further information which would address the issue raised in the previous section, including the exact reference source and version (if applicable).
