**Re.: Editorial review of documents after IR&C complete, LT-Amazonas Project (9501)**

Dear Ms. Hirschheimer,

On behalf of the Chair of the CDM Executive Board, I would like to thank you for your letter of 18 July 2013 communicating your request for the Board to provide clarification on the nature of issues to be addressed in revised documentation, following the information and reporting check (IRC) of project 9051 “Tucuruí-Macapá-Manaus Electrical Interconnected grid” (also referred to as the “LT-Amazonas Project”). Your letter has been made available to the Board.

The issues raised during the IRC of this case included not only editorial clarifications, but also substantial issues requiring revisions to documents in order to make the relevant validation information clear in the submission. Details of these issues were identified in the original incompleteness message and also further discussed during the subsequent direct communication conference call. In this case, the required revisions are not considered minor and hence cannot be treated as issues of editorial nature. In accordance with the *Clean development mechanism project cycle procedure*, version 04.0 para. 66, upon submission of the revised documentation, the request shall be treated as a new submission.

Thank you once again for contacting the Board with your concerns.

Yours sincerely,

PP  
Andrew Howard  
Secretary to the CDM Executive Board
