² As per the applicable modalities and procedures, the Board may make its response publicly available.

³ Latest CDM regulatory documents and information are available at: <http://cdm.unfccc.int/Reference/index.html> .

>> This is regarding clarification on two wind power projects of capacity 12 MW and 3.5 MW of the same project participant. The decision making dates by the entity for both the projects were different and therefore were considered as two separate small scale project activity. All the WTGs are already commissioned. However the distance between few of the WTGs in both the packs are less than 1 KM, and therefore the projects become debundled components of a large scale project activity as per the “Guidelines on Assessment of De-bundling for SSC project activities”, version 03. As the combined capacity for both the projects is exceeding 15 MW, is it possible to exclude 1 WTG from either of these project activities so that the combined capacity can be limited to less than 15 MW and the PP can use simplified modalities and procedures for Small Scale CDM project activity for both the projects separately.	
Requesting for your kind guidance on the same.	
<i>Please provide any specific suggestions or further information which would address the issue raised in the previous section, including the exact reference source and version (if applicable).</i>
