Subject Santo Antonio Hydropower Project (Ref.# 9282)

Honourable Members of the CDM Executive Board,

Due to the fact that a few inputs from the global stakeholders consultation process (GSP) of the Santo Antonio Hydropower Project contained some misinformation about the CDM, the environmental licensing process in Brazil and, the Project itself, the project participants decided to include a separate appendix to the PDD with the responses to the received comments together with the PDD submitted for registration. The intention of the PPs is to increase the transparency of the submission by making not only the DOE validation of the responses but also the full text of the responses to the GSP publicly available. Still with the purpose to guarantee the transparency of the PPs commitment to the Brazilian environmental laws and regulations as well as to the CDM process we are sending you with the present letter a short film about the project. We would like to stress that all the information contained in the film is also available in the validated documents submitted to registration.

We thank you for the opportunity to submit the project for registration and would be very happy to provide any desired clarification,

Kind regards,

Renato Ortega
