

Sector Specific Standard Baselines: Building Capacity and Enhancing Understanding

Presented by:
Albert Altarejos MAGALANG
Co-Chair, DNA Forum

Stakeholder Consultation Workshop on Standardized Baseline under the CDM
4-5 September 2011, Radisson Hotel, Kathmandu, Nepal

Clarification and Inputs

∞ Level of Aggregation

- dependent on the availability of data at the regional, national or sub-national level
- technical advice would be needed

∞ Data Availability and Data Quality

- capacity development is needed in data collection and analysis

∞ Approach Used for Establishing Additionality

- linkage of variety of measures to a particular project activity

Barriers

- ❧ standardized baselines may not be applicable to all project activities
- ❧ absence of available data may affect the development of standardized baselines
- ❧ absence of a technical body in the CDM structure that would provide guidance, approve the SBs, or identify other SBs to be developed
- ❧ under-participation of under-represented regions and sectors

Thank You
