key issues/barriers for the guidelines

Workshop on Standardized Baseline
Raddison Hotel, Kathmandu, Nepal
September 4, 2011

Kazuhiisa KOAKUTSU
Deputy Director, Market Mechanism Group
Institute for Global Environmental Strategies
Ambiguity still remains

- Appropriate “level of aggregation” might be different by project types and countries
  ⇒ Need clarification on data requirement and how to

- Baseline/Additionality demonstration
  ⇒ Positive list is an excellent approach
  ⇒ Guideline should define “threshold” percentage
  ⇒ Baseline (e.g. >50%) Additionality (e.g. <25%)
To be More facilitative!!

◆ level of aggregation
  ⇒ More examples should be provided in the GL

◆ Additionality
  ⇒ Example of positive list should be provided
  ⇒ Approach for barriers analysis should be explored
    ⇒ Provide list of barriers and also proof to demonstrate
  ⇒ Application of investment analysis combined with default values of IRR and calculation sheet

◆ Baseline
  ⇒ Allow the Use of registered CDM project case to identify baseline scenario if in the same country
