

CDM-PA3674-RULE01

Ruling note

Request for issuance for “Yunnan Hongta Cement Waste Heat Recovery Power Generation Project”

Version 01.0

United Nations
Framework Convention on
Climate Change

1. The CDM-Executive Board decided to reject the request for issuance of certified emission reductions (CERs) for the above project activity on 8 March 2013, during its 72nd meeting, for the monitoring period 08 October 2010 - 17 October 2011, in accordance with of the “Procedures for review of requests for issuance of CERs”, version 02.0, EB 64 Annex 4, paragraphs 23 and 24 (the procedures). According to paragraph 28 of the procedures, the rulings shall contain the reasons and rationale for the final decision, which are as follows:
 - (a) The DOE (TUV-NORD) failed to submit a request for approval of post-registration changes prior to submitting the request for issuance in accordance with validation and verification manual (VVM), version 1.2, Paragraph 201, Implementation plan for the Clean Development Mechanism Project Standard, Validation and Verification Standard and Project Cycle Procedure, version 2.0 and Validation and Verification Standard (VVS), version 3.0, Paragraph 249.
 - (b) VVM, version 01.2, paragraph 201 states that where the monitoring plan is not in accordance with the monitoring methodology, DOE shall request a revision to the monitoring plan prior to concluding its verification and making its certification decision.
 - (c) Implementation plan for the Clean Development Mechanism Project Standard, Validation and Verification Standard and Project Cycle Procedure, version 2.0 states that for monitoring period published under the VVM Track since 1 May 2012, if post-registration changes are identified, the submission shall be switched to the VVS Track.
 - (d) VVS, version 03.0, paragraph 249 states that the DOE shall submit the changes via the request for approval of post registration changes process of the Project Cycle Procedure for all changes that are not of a type(s) listed in Appendix 1 of the Project Standard.
 - (e) During implementation of the project activity, it is observed that the metering functions of meters M1, M3, M4 and meter locations of meters M3, M3 (B) and M4 have been changed from the description contained in the registered PDD. A request of revision of monitoring plan was not submitted under the VVM Track prior to 1 May 2012 nor was a post-registration change request submitted for approval prior to submitting the request for issuance, in accordance with VVS.
2. Please note, however, that, in accordance with paragraph 33 of EB64 Annex 4, in cases where the reasons for rejection can be addressed by means of a revised verification report based on a revised monitoring report, the DOE may request permission (including explanation of reasons) to submit a revised request for issuance for the same monitoring period covered by the rejection. The Board will consider such a request at the subsequent EB meeting following that request in accordance with the procedures and decide on a case-by-case basis. In these cases the Board will provide further guidance, as appropriate. In cases where such a revised request for issuance is also rejected it shall not be possible to resubmit for a third time.
