Re.: Effective Registration Date for CDM Project “Partial Fuel Switching to Agricultural Wastes, Sewage Sludge & Refuse Derived Fuel (RDF) at Helwan cement plant”(Ref. no. 9114)

Dear Mr. Aymen,

On behalf of the Chair of the CDM Executive Board (the Board), I would like to thank you for your letter of 3 September 2013 requesting a change to the effective registration date of your CDM project activity 9114 “Partial Fuel Switching to Agricultural Wastes, Sewage Sludge & Refuse Derived Fuel (RDF) at Helwan cement plant”. Your letter has been made available to the Board.

It is noted that in the frame of the project review, no revisions to the validation report and/or supporting documentation were submitted. In addition to that, it has been determined that the clarification document uploaded by the DOE as a response to the request for review does not contain new information, thus does not constitute an additional supporting documentation. It is therefore concluded that paragraph 98 of the PCP is without impact to the aforementioned project.

Please be informed that the effective registration date will therefore be amended to the earlier date. This change to the registration date will be communicated to your designated operational entity (DOE) and your focal point(s) via email.

Thank you once again for contacting the Board with your concerns and requests.

Yours sincerely,

Andrew Howard
Secretary to the CDM Executive Board
