Re.: Prior consideration form containing precise geo-coordinates

Dear Mr. Thangamani Pandian,

On behalf of the Chair of the CDM Executive Board (the Board), I would like to thank you for your letter of 9 October 2013 seeking advice on completing the "prior consideration of the CDM form". Your letter has been made available to the Board.

Regarding the precise project location to be included in the above-mentioned form, project participants may as an alternative wish to include a non-specific geo-coordinate such as the project village, district or state. In cases where several sites or areas are being seriously considered for the project implementation, project participants may wish to indicate these locations. Please however bear in mind that it is the Designated Operational Entity (DOE) which is responsible in the first instance for assessing evidence relating to whether there was prior consideration of the CDM.

I would like to remind you that the purpose of the prior consideration form is to demonstrate for a precise project, that the CDM benefits were seriously considered in the decision to implement the project activity. Project participants are therefore encouraged to include in the "prior consideration of the CDM form" concrete elements (e.g. project name, installed capacity, etc.) which clearly match the request for registration.

Finally please note that questions related to validation activities can be addressed to the DOE validating this project. Letters to the Board are solely intended for issues relating to policy or general matters.

Thank you once again for contacting the Board.

Yours sincerely,

Andrew Howard
Secretary to the CDM Executive Board
