

**CDM-PA2637-RULE01**

## Ruling note

---

# Rationale for the rejection of PRC-2637-001

Version 01.0

**United Nations**  
Framework Convention on  
Climate Change

## 1. Rationale for the rejection of the request for post-registration changes

1. The CDM-Executive Board decided to reject the proposed request for post-registration changes for project activity 2637 on 30 October 2013, in accordance with the *Clean development mechanism project cycle procedure* (CDM-EB65-A32-PROC, version 05.0), paragraphs 153 and 154 (the procedures).
  - (a) The calculation of the Energy produced due to the biogas displacement of fossil fuels (HGy) is not in accordance with the provisions of paragraph 10 and paragraph 13 of methodology I.C./Version 13.
  - (b) The change of the fossil fuel in the baseline scenario was not included in the original request and inserted only after clarification from the secretariat, further this change is not consequential to the changes in the project design thus cannot be classified as a change of the design of the project activity as per the paragraph 221(e) of "CDM project standard", version 2.1 (EB 70 Annex 2).
