

Annex 1
MODALITIES OF THE SUSPENSION
(Version 01.0)

1. The Executive Board of the clean development mechanism (hereinafter referred to as the Board), taking into consideration the recommendation of the Accreditation Panel (CDM-AP), the response of the designated operational entity (DOE), the oral presentation at the hearing and the outcome of the appeal panel assessment, decided, in accordance with paragraph 116 (c) of the clean development mechanism (CDM) Accreditation Procedure, to recommend that the Conference of the Parties serving as the meeting of the Parties (CMP) partially suspend the accreditation and designation of JACO in sectoral scopes 5–12 and 15 with immediate effect.
2. The decision of the Board was based on one outstanding issue identified in the regular surveillance assessment, as JACO was not able to demonstrate compliance with competence requirements of the CDM accreditation standard for sectoral scopes 5–12 and 15.
3. The Board decided that the DOE shall implement corrective actions to address the remaining area of non-compliance at a system level. Evidence of such implementation shall be provided within a period of six months.
4. The Board further decided that the implemented corrective actions shall be verified through a document review, in accordance with section B.12 of the CDM Accreditation Procedure.
5. The Board agreed that JACO may continue to undertake all activities related to validation and verification in sectoral scopes 1–4, 13 and 14.
6. The Board further agreed that JACO could continue to process existing activities in relation to requests for registration and issuance in sectoral scopes 5–12 and 15 that have been submitted to the Board prior to this suspension. JACO may therefore:
 - (a) Respond to issues related to completeness checks of requests for registration and issuance, renewal of crediting period and post-registration changes;
 - (b) Respond to issues raised in reviews and requests for reviews of requests for registration and issuance;
 - (c) Submit documentation requested by the Board as part of the outcome of a previous request for review or review.
7. Until termination of the suspension, JACO may continue to undertake activities related to validation and verification in sectoral scopes 5–12 and 15 under existing contracts, with the exception of the following:
 - (a) Upload project design documents (PDDs) for public comments as part of the validation process;
 - (b) Upload monitoring reports as part of the verification process;

- (c) Submit new requests for registration for CDM project activities;
- (d) Submit new requests for issuance of certified emission reductions;
- (e) Submit new requests for renewal of crediting period;
- (f) Submit new requests for approval of post-registration changes for registered PDDs
