

THE DESIGNATED NATIONAL AUTHORITY
THE DIRECTOR GENERAL OF ENVIRONMENT
MINISTRY OF WORKS, INFRASTRUCTURE, NATURAL
RESOURCES AND ENVIRONMENT

SAO TOME

Date: 6 June 2014

N/Ref: 277/JMB-DG/2014

Dear Sir,

Data on fuel consumption in our power plants

In connection with the calculation of greenhouse gas emissions from the Sao Tomé's electric power grid for the UNFCCC-BOAD and the UNEP Risø Center, we are pleased to share with you the following information:

- Data on fuel consumption by power plants in Sao Tomé, Santo Amaro and Bobo-Farro as reported by water and electric power company (AMAE) are official and give an accurate picture of quantities of fuel actually used.
- The São Tomé, Santo Amaro and Bobo-Farro power plants are part of the São Tomé's interconnected electric power generation system.

While hoping that due consideration will be given to the foregoing, I remain,

Yours truly,

Signed and sealed (illegible)

José Maria Afonso de Barros
Director General
